Experience

Front-End Development Expertise

I have a wide range of experience in web development, with a focus on front-end technologies such as HTML, CSS, and JavaScript with a particular focus on ReactJS. I love to use ReactJS with React MUI and React Bootstrap, as I believe these libraries provide a great foundation for building user-friendly and visually appealing websites. I am a skilled web designer and developer with a focus on creating high-quality and responsive websites.

My Expertise in Back-End Development

I am also proficient in using backend technologies such as Node.js with MongoDB and php with XAMP. I have a strong understanding of the entire web development process.

My Journey

My interest in web development began during my Master's degree in Computer Science at AWKUM University. I have since learned a great deal about computer science, but my true passion lies in web development

Now I am confident that I have the skills and experience to create high-quality websites that meet the needs of any user

Education

2020 - 2022

FG College Nowshera
(UOP)

Bachelor Of Computer Science

Marks Obtained: 372/550
1st Division

2022 - 2024

AWKUM

Master of Computer Science

GPA: 3.2/4

Hobbies

I find that playing Video Games helps me to clear my head and recharge my batteries so that I can come back to my coding work refreshed and ready to focus.
